

**ENGINEERING AND
TECHNOLOGY ENROLLMENTS
FALL 1983**

PART I

Engineering Enrollments by School and by Curriculum
For All Students Including a Breakdown by Women,
Minorities and Foreign Nationals

A Report of an Annual Survey
Conducted by the

ENGINEERING MANPOWER COMMISSION

A Commission of the Engineering Affairs Council
of the
American Association of Engineering Societies, Inc.
345 East 47th Street
New York, New York 10017

ENGINEERING AND TECHNOLOGY ENROLLMENTS FALL 1983

PART I

© 1984 by the Engineering Manpower Commission of the American
Association of Engineering Societies, Inc.

As it is the objective of AAES, Inc. publications to be a forum for the free expression and interchange of ideas, the opinions, positions, and research stated in published works are those of the original researchers and authors and not by the fact of publication necessarily those of the American Association of Engineering Societies, Inc., or related bodies. Contributing researchers and authors are requested and expected to disclose any financial, economic, or professional interests or affiliations that may have influenced positions taken or advocated in these materials.

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The American Association of Engineering Societies (AAES) is a national federation of organizations representing nearly one million engineers.

As a central coordinating organization, AAES focuses the resources of the engineering societies on technological issues of national and international importance.

1984 OFFICERS

Nicholas J. Radell
Chairman

John A. White
Secretary/Treasurer

James Y. Oldshue
Chairman-Elect

Robert M. Saunders
Past-Chairman

Daniel V. DeSimone
Executive Director

ENGINEERING AFFAIRS COUNCIL

The Engineering Affairs Council is responsible for matters concerned with the practice of engineering in the public interest. The Council encourages voluntary exchanges of information, coordination of goals and joint action.

1984 OFFICERS

William E. Carew
Chairman

Patrick J. Sheridan
Secretary/Treasurer

Edward J. Doyle
Vice-Chairman

THE ENGINEERING MANPOWER COMMISSION
of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The Engineering Manpower Commission was organized in 1950 to serve as a focus for national technological manpower issues.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

"To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Engineering Affairs Council of AAES."

ENGINEERING MANPOWER COMMISSION
1984 OFFICERS

Dorothy Morris
Chairman

Donald G. Schroeter
Vice-Chairman

Paul B. Wood
Vice-Chairman

Ed T. Kirkpatrick
Chairman, Education Committee

Francis W. Stacey
Chairman, Enrollment Survey

MANPOWER ACTIVITIES STAFF

Patrick J. Sheridan
Director

Carolyn J. Heydt
Manager

Deborah C. Seiler
Manpower Statistician

ACKNOWLEDGEMENTS

The Engineering Manpower Commission is grateful for the cooperation of the hundreds of deans and college officials who provided the data on which this report is based. This survey was conducted by the EMC staff in consultation with Dr. Francis W. Stacey, Chairman of the Enrollment Survey.

Combined Summary	401

INTRODUCTION

Since 1967, the Engineering Manpower Commission has conducted annual studies of engineering and technology enrollments in order to provide timely and accurate education data. This publication is the sixteenth in that series and reflects enrollments as of the fall of 1983.

This report is divided into two parts and presents data for all students enrolled in engineering and engineering technology programs by curriculum and school. Summaries of student enrollment in ABET-accredited programs are shown. Undergraduate students are reported by year and graduate students by degree level. Data is presented for all students combined, as well as for women, Blacks, Hispanics, American Indians, Asian/Pacific Islanders, and foreign national students. It should be noted that Part I deals exclusively with engineering enrollments and Part II with engineering technology enrollments.

Part I contains detailed *engineering* enrollment data by school for all students, women, Blacks, Hispanics, American Indians, Asian/Pacific Islanders, and foreign national students. It also contains detailed data by curriculum for all the above mentioned groups, as well as summary curriculum data, combined for all schools.

Part II contains detailed engineering *technology* enrollment data by school for all students, women, Blacks, Hispanics, American Indians, Asian/Pacific Islanders, and foreign national students. It also contains detailed data by curriculum for each of the above groups of students, as well as summary curriculum data, combined for all schools.

Although every attempt has been made to eliminate errors in reporting the statistics, some discrepancies may appear. In several cases, inconsistencies in the data submitted have been corrected, or related curricula grouped under a common title so that this report would be manageable in size. Any questions regarding the course content of a specified program should be directed to the reporting institution. Users of this report are advised to read the explanatory material before using the data tables provided herein.

For the convenience of users, these parts of Engineering and Technology Enrollments — Fall 1983 are available separately or as a set. Orders may be placed with the Publications Department, American Association of Engineering Societies, 345 East 47th Street, New York, New York 10017.

THE 1983 ENGINEERING ENROLLMENT SURVEY

In September of 1983, questionnaires were sent to 292 U.S. schools offering engineering programs at least at the bachelor's degree level.

ESTIMATED DATA

Information was not received from the following engineering schools at the time of publication. In order to present reasonably comparative data to previous reports, information from the 1982 report has been substituted for these institutions:

Humboldt State
West Coast University
University of Evansville
Tulane University
U.S. Naval Academy
University of Lowell
Western New England College
Polytechnic Institute of N.Y.

Union College
University of Nevada (graduate programs only)
Grove City College
Lehigh University
Villanova University
University of Puerto Rico (graduate programs only)
University of Utah School of Mines
Seattle Pacific University
West Virginia Institute of Technology

Previous year's data is indicated in this report by an asterisk(*) appearing before the substituted entry.

The following engineering schools have not provided us with data recent enough to be of accurate use in this publication. We regret that we are unable to include their data in this year's publication:

San Francisco State University
Northeastern Oklahoma State

These engineering schools are listed in the report with "XX" following the school name to indicate where their data would have appeared. An estimate of the combined data for these schools appears at the end of each section of the report under the heading of "XX All Unreported".

DATA TABLES

It should be noted that the following features are common to all tables:

- (a) The figures for the individual undergraduate years are for FULL-TIME students only. All part-time enrollments are combined regardless of the student's academic standing.
- (b) Full-time advanced degree enrollments are reported under the headings of master's, engineer, or doctorate degrees, and as a total for all full-time graduate students. All part-time graduate student enrollments are combined in one column.

Accreditation and Control Identification (AC). Schools have been assigned a two-digit code to indicate accreditation and public or private control.

The first digit (1-6) indicates accreditation as follows:

- 1 = At least one engineering curriculum accredited by ABET (1981 list). Used only in the engineering tables.
- 2 = At least one technology curriculum accredited by ABET (1981 list). Used only in technology tables.
- 4 = Accredited by regional accrediting commission (1981-1982 list).
- 5 = Accredited by National Association of Trade and Technical Schools (NATTS, 1981-82 list).
- 6 = None of the above.

The second digit (1-5) indicates control as follows:

- 1 = Public - state or local government control
- 2 = Public - federal government control
- 3 = Private - non-profit, non-sectarian
- 4 = Private - religious
- 5 = Private - proprietary

For the purposes of recording accreditation status, information was obtained from the Accreditation Board for Engineering & Technology (ABET) 1981 report. ABET-accreditation status for bachelor's and master's degree programs is shown in the column designated "AC" where curricula are listed individually.

**HISTORICAL SUMMARY
ENGINEERING ENROLLMENTS IN FALL, 1983
As Compared With Earlier Years**
